

# SKIOLD SYSTEM BACKUP

NEW!

SKIOLD MAKES THE DIFFERENCE!

## Minimize the risk of operational loss with the new SKIOLD System Backup program for Distriwin, DM6000, ESF and Flexmix Pro.

Once a day, SKIOLD System Backup makes a backup copy of plant and production data, which is stored on an external SKIOLD server where the data is available if you need to reload it. You are always guaranteed a backup of the latest data should the system be hit by crashes due to lightning / overload etc. With SKIOLD System Backup you are guaranteed minimal downtime and your operating losses are minimized significantly.

### With SKIOLD System Backup you will avoid problems with:

- Broken E-check.
- Re-entry of animals, silos, graphs, recipes and basic data etc.
- Lost feeding and lack of growth.
- Concerns about crashes on own PC, viruses or hacker attacks.
