

MULTCOM SOFTWARE

The screenshot shows the 'datamix multifeeder 5000: Sigsgaard' software interface. It includes several panels:

- Aktivitet for blander: 1**: Shows 'VÅDFODER' with 'Indhold Kg' of 747 and 'INGEN AKTIVITET'.
- Oversigt Stier**: A table with columns 'Nr', 'Søer', 'Cyklus', 'Grise', 'Vægt', 'Fe/dag', and 'Afv.'. It lists several rows of data.
- Oversigt Fodertider**: A table with columns 'Pos', 'Bl', 'Nr', 'Plan', 'Rec', 'Art', 'Blanding', and 'Udfodring'. It shows feeding schedules for different positions.
- Aktuelle Alarmer**: A list of active alarms with timestamps and descriptions like '11/02 00:02 Blander 3 INGEN FODER'.

SKIOLD MAKES THE DIFFERENCE!

The software programme "MultCom" for PC provides the possibility to type and edit data in the DM5000 liquid feeding system. All editable and management data such as recipes, feed plans, feeding times, on- and off-times, valve data, sow data, feeding curves and silos can be checked, edited and printed.

Furthermore, animals can be counted, the feed consumption can be summarized, and alarms can be reset via MultCom. It is, however, not possible to show an overview drawing the liquid feeding system.

MultCom requires P-Net to be installed, and operates as the link from DM5000 and PDA hand terminals to the AgroSoft management system.

Functional demands	Item number	Description
P-Net communication to PC must be installed.	140256505857	P-Net to IP interface IP.99
	140596000020	Charger 230VAC/24VDC/70mA
VIGO version 5.6 or newer must be installed.	140800031000	VIGO 5.6 Installation.
	140800031010	VIGO 5.6 Upgrade.

Item number	Description
140800203000	MultCom Installation GB for DM5000
140800203010	MultCom Upgrade GB for DM5000
140982003820	Manual MultCom GB
140981000136	Manual DM5000 GB
